

Dear Business Owner,

Many weak and misguided businesses are caving to a power-hungry federal government making businesses do its dirty work. Do you really want to be vaccine enforcers? It is unfair, unethical, and just plain wrong to your employees. Mandates are not real laws. Congress did not vote to make these laws. Fauci is making rules and suggestions, and not one person voted for him in that position. The federal government is side-stepping our American process and our constitution with their bullying mandates and corporate/business partnerships. Look back in history and compare. Do you really want to be on the wrong side of this when it all turns around? Please reconsider and choose to be on the right side for your employees. Choose to respect and honor them and their personal choices. Not only are you holding their livelihoods over their heads in exchange for shot compliance, you are causing great anxiety and distress to entire families. You honestly have no idea what will happen to them in the long-run and you are also violating medical and personal privacy. Employees are scared. They have car payments, mortgages, families, expenses. You are making them choose between losing all of that and injecting drugs repeatedly that will make them sick immediately and potentially make them sick in the future. You don't know the outcome, so how on earth can you institute this mandate out of fear and government tyranny?

These shots are not really vaccines but more like therapeutics and are required frequently. Just because the CDC changes its definition of a vaccine to fit their current narrative, doesn't make it right. They changed the long-standing definition because this one product is not effective. It does not protect or prevent the spread. If a vaccine works, it should not matter what someone else has or whether they are wearing a useless mask. Science tells us how small the covid particles are and how they pass right through cloth masks. Even store-bought masks print on the boxes that they do not prevent disease transmission yet employees are forced to wear them. The rules keep changing because the government is desperate and people do not like being controlled.

The only way to have a happy, calm workforce is to let people be free to make choices for their bodies. Nobody ever cared who got a flu shot. The media has instilled massive fear. It's time that ends. You can help by pushing back and standing up for your employees. You are not their doctor and not offering informed consent or taking responsibility if they have a reaction. Are you willing to cover medical costs for long-term effects, which are very real and very true according to VAERS (heart inflammation, heart attacks, shingles, allergic reaction, extreme constant fatigue, brain damage, blood clots, strokes, weakened overall immune systems, death - all on VAERS)? The numbers on the VAERS website are also underreported, so the reactions, deaths, and long-term serious side effects are much greater than the site actually states.

You have a unique position to be a champion for Americans or be a TYRANT causing your employees to disrespect you, create negative PR, and generally create a very undesirable place to work. If you think you can just mandate a shot with no negative repercussions, you are very naïve. Your employees will resent you, hate you, and will not put in 110% for you. They will do the bare minimum to get paid. This is what you will be creating. Please respect your employees. They spend more time at your facility than they do with their own families. Push back. Take out your personal fear and belief. One size does not fit all. For just a moment imagine something you do not want in your body. Now imagine being forced to get that every six months or lose your job, your house, your car, your ability to provide for a family.

America was built on freedom and choice. All of that is quickly getting erased. Please do not be a part of the destruction of this country and its founding values. It's a slippery slope. Never before in history has a vaccine or never-ending shots been dictated to all of humanity even children. Not ever. Nowhere in our constitution does it say our government should impose shots for all under certain circumstances. They had disease and sickness, but they knew better than to dictate this. They fled dictators. Please do not contribute to this tyranny.

Sincerely,
